Detailed Action

1.) Applicant has amended his specification to designate the instant application as a continuation of application no. 09/804,686 instead of a continuation-in-part of 09/058,741. The request for a supplemental oath in the first paragraph of the Office action mailed on 10/14/2005 is withdrawn.

2.) The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3.) Claims 1, 3, 7, 21, 23, and 24 are rejected under 35 U.S.C. 102(b) as being anticipated by Tews (5,148,000). Figures 4 and 17 and the discussion in columns 5-7 and column 13 in the patent to Tews (5,148,000) disclose a welding system with the features claimed, including: an operator control panel comprised of element 120 and associated computer card 202; welding power supply with associated power supply module at element 104, with associated elements 212, 220, and 202 whereby the power supply is communicated a welding voltage from element 212 connected to element 104 and a feedback voltage from the power supply is made available as shown in figure 4 under the section labeled “Internal welder front end”, the “torch 1 arc voltage” connected to “analog input card” 212; a common bus 100 that permits communications between the operator control panel and the plural modules; a wire feed module as discussed at

column 13, lines 20-50; and a torch oscillation module as discussed at column 6, lines 14-21 and at column 7, lines 20-25.

4.) Applicant's "Remarks" in his amendment filed on 4/14/2006 have been given careful consideration, but are not persuasive of patentability in view of the new grounds of rejection in the instant Office action.
